

In response to the forthcoming changes in the National and European legislation on data protection, ORAK Engineering has carried out in-depth research and made the necessary changes in its software, tailored to the branch of all its clients. This will allow a company using our software to bring its technology into line with the GDPR General Regulation!

The deadline for companies to take action against the requirements of the new General Data Protection Regulation (GDPR) expires on May 25, 2018. If the activity of your company involves the storage of any data for customers, partners and employees, you must comply with the requirements of the new regulation, which leads to urgent changes in the information system that we implement

Useful information:

The General Data Protection Regulation (or the General Data Protection Regulation) concerns any EU business that stores personal data in its masses. The requirements are complex and the fines for non-compliance are high (up to 4% of the total turnover of the organization or up to 20m euros). The EU data storage requirements introduced by the GDPR are related to organizational and technological measures as well as measures for storing the information in the information system implemented by ORAK.

What are personal data? Personal data is the data by which a person can be identified, such as name, gender, age, personal ID, email, direct phone, photo, bank details, IP address, etc. The value of personal data is often underestimated but, in fact, it is one of the most valuable assets for any business that poses significant risks in improper storage!

Individuals are entitled:

- ·of consent to the processing of personal data;
- ·to learn about the subject of processing their personal data;
- ·access to your personal data;
- ·to correct mistakes in your personal data;
- ·delete your personal information;
- ·to withdraw their consent to the processing of their personal data.

ORAK Engineering has a final version of all its software products, which covers the requirements of the database encryption, encryption of communication, personal data processing consent, and the right to be forgotten.

Our team is ready to install the new versions and modules of the software products used by its client and to provide all the necessary contractual documentation for the GDPR Compatibility Measures.

For all companies that have not found a solution to their requirements to the requirements of the General Regulation, ORAK Engineering is ready to provide a complete software solution with the latest version and special module GDPR Assistant to ensure trouble-free operation of the program!

What will all new and current ORAK clients receive?

- ·Software program for the branch in which they operate with the latest version;
- ·Encryption of the database according to Art. 32 (1a);
- ·Encryption of communication;
- ·Documents for consent to the processing of personal data;
